Proposal Details

Proposal No	A/TG/MIN/26472/2013	Category	Non-Coal Mining		
Proposal Name	MELLACHERUVU LIMESTONE MINE (141.644 Ha; 1.95 MTPA) OF M/s. MY HOME INDUSTRIES PRIVATE LIMITED LOCATED AT MELLACERUVU VILLAGE & MANDAL , SURYAPET DISTRICT.				
Plot / Survey/ Khasra No.		Village(s)		Sub-District(s)	
State	TELANGANA	District	SURYAPET		
MoEF File No	J-11015/113/2013-IA.II(M)	Name of the Entity/ Corporate Office	MY HOME INDUSTRIES PRIVATE LIMITED	Entity's PAN	NA
Entity Name as per PAN	NA	Entity details mentioned above is correct ?	Agree

Compliance Reporting Details

Reporting Year	2023	Reporting Period	01 Dec(01 Apr - 30 Sep)
Remark(if any)	Enclosed Six Monthly Environmental Clearance Compliance status report for the period APRIL'2023 to SEPTEMBER'2023 of our MELLACHERUVU LIMESTONE MINE.		

Details of Production and Project Area

Date of Commencement of Project/Activity 08-07-2001

	Project Area as per EC Granted(ha.)	Actual Project Area in Possession(ha.)
Private	0	0
Revenue Land	0	0
Forest	0	0
Others	0	0
Total	0	0

PRODUCTION CAPACITY

Sr.No.	Name of the Product	Units	As per EC Granted	As per CTO Granted	CTO ID	Valid Up To	Production during last financial year
1	LIMESTONE	Million Tons per Annum (MTPA)	1.95	1.95	210522983054	30-06-2026	1.616

Conditions

Specific Conditions

Sr.No.	Condition Type	Condition Details	Status of Compliance,Remarks/Reason and Supporting Documents	
1	Statutory compliance	The Project will implement and comply with all applicable safeguard measures as provided in OM No. Z-11013/57/2014-IA.II (M) dated 29th October, 2014.	PPs Submission	We have implemented and complying with the applicable safe guard measures provided in the OM. Being Complied Attachment: Click to View
2	Statutory compliance	The Project proponent shall obtain Consent to Establish and Consent to Operate from the State Pollution Control Board and effectively implement all the conditions stipulated therein.	PPs Submission	Consent to Operate is obtained (renewed) from the SPCB vide order No. 210522983054, Dt: 23.07.2021 valid up to 30.06.2026 and implemented the stipulated conditions. Complied Attachment: Click to View
3	Statutory compliance	The Mining Operations shall be restricted to above ground water table and it should not intersect the ground water table.	PPs Submission	we have not touched the ground water. All possible efforts are being made towards establishing measures to augment ground water sources. Being Complied Attachment: NA
4	WATER QUALITY MONITORING AND PRESERVATION	The loose solids should be kept separately from flowing water and flow of effluents to nearby areas outside the lease hold shall be prevented. The	PPs Submission	There is no topsoil or generation of Over Burden dump in the mine. The balance area in the mining lease area is out-cropped. Complied Attachment: NA

		paved drains along with arrangements for Over Burden Dumps and their drainage may clearly depicted on a contoured map of the mining area.		
5	MINING PLAN	The project proponent shall ensure that no natural watercourse and /or water resources shall be obstructed due to any mining operations. Adequate measures shall be taken for conservation and protection of the 1st and 2nd order streams, emanating or passing through the mine lease during the course of mining operation.	PPs Submission	There are no natural water streams that pass through the mine. Complied Attachment: NA
6	LAND RECLAMATION	Topsoil, if any shall temporally be stored at earmarked site(s) only and it should not be kept unutilized for long. The topsoil shall be used for land reclamation and plantation.	PPs Submission	The balance area in the mining lease area is out-cropped and there is no topsoil or Over Burden dump generation. Being Complied Attachment: NA
7	WATER QUALITY MONITORING AND PRESERVATION	Appropriate safeguard measures shall be taken to ensure stability and drainage of dumps so that no solid waste/ debris flow into nallah.	PPs Submission	There are no OB dumps in mine lease. However, measures are taken to ensure no solid waste / debris flow into nearby nallah. Being Complied Attachment: NA

8	MINING PLAN	<p>The over burden (OB) generated during the mining operation shall be stacked at earmarked dump site(s) only and it should not be kept active for a long period of time and their phase-wise stabilization shall be carried out. Proper terracing of OB dumps(s) shall be carried out. The over burden dumps(s) shall be scientifically vegetated with suitable native species to prevent erosion and surface run off. In critical areas, use of geo textiles shall be undertaken for stabilization of the dumps. Monitoring and management of rehabilitated area should continue until the vegetation becomes self-sustaining. Compliance status should be submitted to the MoEF&CC at its Regional Office Chennai on six monthly basis.</p>	<table border="1"> <tr> <td data-bbox="972 73 1227 272">PPs Submission</td> <td data-bbox="1227 73 2002 272"> Limestone is outcropped and there is no topsoil available / generated / removed. Being Complied Attachment: NA </td> </tr> </table>	PPs Submission	Limestone is outcropped and there is no topsoil available / generated / removed. Being Complied Attachment: NA
PPs Submission	Limestone is outcropped and there is no topsoil available / generated / removed. Being Complied Attachment: NA				

9	MINING PLAN	Catch drains and siltation ponds of appropriate size shall be constructed working pit. Temporary OB and mineral dumps to arrest flow of silt and sediment directly into adjoining River and other water bodies. The water so collected should be utilized for watering the mine area, roads, green belt development etc. The drains should be regularly desilted particularly after the monsoon and maintained properly.	PPs Submission	A bund of 7.5m width is formed all along the lease boundary. The bund act as a barrier to arrest runoff from the mine. Runoff is being collected into mine sump which acts as sedimentation tank. Being Complied Attachment: NA
10	MINING PLAN	Dimension of retaining wall at toe of OB dump(s) and OB benches within the mine to check run-off and siltation should be based on the rainfall data.	PPs Submission	There is no generation of OB in subject mine. Being Complied Attachment: NA
11	GREENBELT	Plantation shall be raised in a specified area including a 7.5 m wide green belt in the safety Zone around the mining lease, OB Dumps (s), along the roads, etc. by planting the native species in consultation with the local DFO / Agriculture Department. In addition, Plantation shall also be raised in the backfilled and reclaimed	PPs Submission	Greenbelt belt is being developed in a phased manner with native plant species. Overall 18.67 Ha. Developed with greenbelt 21,875 No?s. Saplings as on 30.09.2023. Being Complied Attachment: Click to View

		area and around water body. The density of the tress should be around 1500 plants per Ha.		
12	AIR QUALITY MONITORING AND PRESERVATION	Effective safeguard measures, such as regular water sprinkling shall be carried out in critical areas prone to air pollution and having high levels of particulate matter such as around crushing and screening plant, loading and unloading point and shall transfer points. Extensive water sprinkling shall be carried out on haul roads. It should be ensured that the Ambient Air Quality parameters conform to the norms prescribed by Central Pollution Control Board in this regard.	PPs Submission	Water spraying arrangement is provided at crusher dump hopper and bag filters are provided at all transfer points to control fugitive emissions. ? Crusher is being operated with bag filter. ? Water sprinkler system is provided along the haul roads. Being Complied Attachment: Click to View
13	WATER QUALITY MONITORING AND PRESERVATION	Regular monitoring of water quality upstream and downstream of perennial nallahs falling in the impact zone shall be carried out and record of monitoring data should be maintained and submitted to Ministry of Environment, Forests and Climate Change, its regional office, Chennai, Central Groundwater Authority, Regional	PPs Submission	There are no perennial nallahs that flow through Mellacheruvu Mine Lease area. Being Complied Attachment: NA

		Director, Central Groundwater Board, State Pollution Control Board and Central Pollution Control Board.		
14	MINING PLAN	Appropriate measures shall be taken for treatment of the upper catchment of the mine lease area	PPs Submission	Mine sump is formed which acts as settling tank. Complied Attachment: NA
15	WATER QUALITY MONITORING AND PRESERVATION	The project authority should implement suitable conservation measures to augment ground water resources in the area in consultation with Regional Director, Central Groundwater Board.	PPs Submission	Mine sump helps in recharging the ground water. Being Complied Attachment: NA
16	WATER QUALITY MONITORING AND PRESERVATION	Regular monitoring of ground water level and quality should be carried out in and around mine lease area by establishing a network of existing wells and Installing new piezometers during mining operation. The periodic monitoring [(at least 4 times a year in a year pre-monsoon (April/May), monsoon (August), post-monsoon (November) and winter (January); once in each season)]. Shall be carried out in consultation with	PPs Submission	? Seasonal monitoring of ground water level and quality is being carried out. ? piezometers were established for ground water quality & levels monitoring. Being Complied Attachment: Click to View

		the State Ground water Board/Central Ground water Authority and the data thus collected may be sent to the regularly to the MoEF&CC and its Regional office Chennai, the Central Ground Water Authority and the Regional Director, Central Groundwater Board. If at any stage, it is observed that the groundwater table is getting depleted due to the mining activity; necessary corrective measures shall be carried out.		
17	Statutory compliance	The project proponent shall obtain necessary prior permission of the competent authorities for drawl of requisite quantity of water required for the project.	PPs Submission	No ground water is drawn from the subject mine. The mine sump acts as water storage tank which is utilized for greenbelt maintenance and road sprinkling on haul roads to suppress the dust. Being Complied Attachment: NA
18	MINING PLAN	Suitable rainwater harvesting measures on long term basis shall be planned and implemented in consultation with the Regional Director, Central Groundwater Board.	PPs Submission	The present mine sump act as a rain water harvesting structure. Being Complied Attachment: NA
19	MINING PLAN	Appropriate mitigative measures should be taken to prevent pollution of	PPs Submission	There is no river near to the Mellacheruvu Limestone Mine lease area. Nearest river to the subject mine is Krishna River which is at a

		nearby river in consultation with the State Pollution Control Board.		distance of 15 Kms. Complied Attachment: NA
20	AIR QUALITY MONITORING AND PRESERVATION	Vehicular emissions should be kept under control and regularly monitored. Measures shall be taken for maintenance of Vehicles used in mining operations and in transportation of mineral. The mineral transportation shall be carried out through the covered trucks only and the vehicles carrying the mineral shall not be overloaded.	PPs Submission	Vehicles are being well maintained as per the scheduled maintenance. Overloading of vehicles is strictly prohibited and wetted during transportation to crusher. Being Complied Attachment: NA
21	Risk Mitigation and Disaster Management	Controlled blasting should be practiced. The mitigative measures for control of ground vibrations and to arrest fly rocks and boulders should be implemented.	PPs Submission	Blasting is carried out only during day time as per the recommendations of DGMS. Ground vibrations and fly rock are being well controlled by using non-el bottom initiation detonators. Being Complied Attachment: NA
22	AIR QUALITY MONITORING AND PRESERVATION	Drills shall either be operated with dust extractors or equipped with water injection system.	PPs Submission	Wet drilling is being practiced to control the dust emission during extraction. Being Complied Attachment: NA
23	AIR QUALITY MONITORING AND PRESERVATION	Mineral handling areas shall be provided with the adequate number of high	PPs Submission	Wet drilling is being practiced and water spraying is done on haul roads. Water spraying arrangement is provided at crusher dump hopper, water sprinklers are provided at loading and unloading

		efficiency dust extraction system. Loading and unloading areas including all the transfer points should also have efficient dust control arrangements. These should be properly maintained and operated.		points to control fugitive emissions. Being Complied Attachment: NA
24	WATER QUALITY MONITORING AND PRESERVATION	Sewage treatment plant shall be installed for the colony. ETP shall also be provided for the workshop and wastewater generated during the mining operation.	PPs Submission	? Sewage Treatment Plant of 400 KLD is in operation in the colony. ? No waste water is generated during mining operations. ? Waste water generated from vehicle washings are routed through Oil & Grease separator then followed by sedimentation trap and then to on land for vegetation. Being Complied Attachment: Click to View
25	Human Health Environment	Pre-placement medical examination and periodical medical examination of the workers engaged in the project shall be carried out and records maintained. For the purpose, schedule of health examination of the workers should be drawn and followed accordingly.	PPs Submission	Pre-employment medical examination and periodical occupational health surveillance programme for the workers is being undertaken. Annual medical check-up conducted for all employees (367 nos.) by external diagnostic laboratory M/s. Yodha Diagnosis, Hyderabad on 10th - 11th Sep, 2023. Being Complied Attachment: NA

26	Human Health Environment	Regular monitoring of free silica in the dust will be carried out and records maintained. It shall be ensured that the levels of silica do not exceed the prescribed limits. The workers will be provided with personal protective measures to guard against inhaling silica dust.	PPs Submission	Free silica is monitored on the regular basis. Reports are being maintained. Free silica content in the dust is well below the prescribed limits. Being Complied Attachment: NA
27	Human Health Environment	Provision shall be made for the housing of construction labor within the site with all necessary infrastructure and facilities such as fuel for cooking, mobile toilets, mobile STP, safe drinking water, medical health care, crèche etc. The housing may be in the form of temporary structure to be removed after the completion of the project.	PPs Submission	its is an opencast mine for limestone extraction hence no housing required. Complied Attachment: NA
28	MISCELLANEOUS	The project proponent should take all precautionary measures during mining operation for conservation and protection of endangered flora as well as endangered fauna in the study area. Action plan for conservation of flora	PPs Submission	No endangered flora and fauna is present in the project area. Details has been submitted letter vide no. MHIL/ENV-HO/2015-16/0022 dated 01-08-2015 along with the certificate issued by the Forest Department, Nalgonda. Complied Attachment: NA

		and fauna shall be prepared and implemented in consultation with the state Forest and Wildlife Department. Necessary allocation of funds for implementation of the conservation plan shall be made and the funds so allocated shall be included in the project cost. Copy of action plan may be submitted to the ministry and its regional office at Chennai within 3 months.		
29	AIR QUALITY MONITORING AND PRESERVATION	The critical parameters such as RSPM (Particulate matter with size less than 10 micron i.e., PM10) and NOx in the ambient air within the impact zone, peak particle velocity at 300m distance or within the nearest habitation, whichever is closer shall be monitored periodically. Further, quality of discharged water shall also be monitored (TDS, DO, pH and Total Suspended Solids (TSS)). The monitored data shall be uploaded on the website of the company as well as displayed on a display board at the project site	PPs Submission	All applicable critical parameters, mine sump water quality parameters are being monitored on regular basis. The results are displayed on the board provided at the main gate and the reports submitted Being Complied Attachment: NA

		at a suitable location near the main gate of the company in public domain. The Circular No.J-20012/1/2006-IA.II (M) dated 27.05.2009 issued by MoEF&CC, which is available on the website of the ministry www.envfor.nic.in shall also refer in this regard for its compliance.			
30	MINING PLAN	A final mine closure Plan along with details of corpus fund should be submitted to the MoEF&CC 5 years in advance of final mine closure of approval.	<table border="1"> <tr> <td>PPs Submission</td> <td>Presently, mine is active. Mine decommissioning plan will be submitted 5 years in advance to MoEF&CC. Agreed to Comply Attachment: NA</td> </tr> </table>	PPs Submission	Presently, mine is active. Mine decommissioning plan will be submitted 5 years in advance to MoEF&CC. Agreed to Comply Attachment: NA
PPs Submission	Presently, mine is active. Mine decommissioning plan will be submitted 5 years in advance to MoEF&CC. Agreed to Comply Attachment: NA				
31	PUBLIC HEARING	The project proponent shall undertake all the commitments made during the public hearing and effectively address the concerns raised by the locals, in the public hearing as well as during consideration of the project, while implementing the project.	<table border="1"> <tr> <td>PPs Submission</td> <td>Being Implemented. Complied Attachment: NA</td> </tr> </table>	PPs Submission	Being Implemented. Complied Attachment: NA
PPs Submission	Being Implemented. Complied Attachment: NA				

General Conditions

Sr.No.	Condition Heading	Condition Details	Status of Compliance,Remarks/Reason and Supporting Documents
--------	-------------------	-------------------	--

1	Statutory compliance	No change in mining technology and scope of working should be made without prior approval of the Ministry of Environment, Forests & Climate Change.	PPs Submission	Opencast and fully mechanized mining method is adopted. Prior approval will be obtained from MoEF&CC if there is any change in mining technology. Complied Attachment: NA
2	Statutory compliance	No change in the calendar plan including excavation, quantum of mineral limestone and waste should be made.	PPs Submission	There is no change in the calendar plan. Limestone production details of last 5 years as follows : 2018-19 : 19,49,973 MT; 2019-20: 14,90,000 MT; 2020-21: 11,50,000 MT; 2021-22: 14,80,000 MT; 2022-23: 16,16,000 MT; 2023-24: 6,61,915 MT (APRIL'23 - SEPTEMBER'23) Complied Attachment: NA
3	AIR QUALITY MONITORING AND PRESERVATION	Four ambient air quality-monitoring stations should be established in the core zone as well as in the buffer zone for RSPM (Particulate Matter with size <10 microns i.e., PM10) and NOx Monitoring. Location of the stations should be decided based on the meteorological data, topographical features and environmentally and ecologically sensitive targets and frequency of monitoring Should be undertaken in consultation with the State Pollution Control Board.	PPs Submission	? Ambient air quality monitoring is done at 8 locations in the core zone as well as buffer zone covering all mine leases based on the meteorological data. ? We are getting ambient air quality monitored monthly by MoEF&CC recognized environmental laboratory. Complied Attachment: Click to View

4	AIR QUALITY MONITORING AND PRESERVATION	Data on ambient air RSPM (Particulate Matter with size less than 10 microns i.e., PM10) and NOx should be regularly submitted to the MoEF&CC including its Regional Office located at Chennai and the State Pollution Control Board / Central Pollution Control Board once in six months.	PPs Submission	Ambient air quality monitoring data is being regularly submitted to Regional Office of MoEF&CC along with the half yearly compliance report and monthly to TSPCB. Complied Attachment: NA
5	AIR QUALITY MONITORING AND PRESERVATION	Fugitive dust emissions from all the sources should controlled regularly. Water spraying arrangement in haul roads, loading and un loading and at transfer points should be provided and properly maintained.	PPs Submission	Wet drilling is being practiced and water spraying is done on haul roads. Crusher is being operated with bag filter. Water spraying arrangement is provided at crusher dump hopper and unit bag filters are also provided at all transfer points of this section to control fugitive emissions. Water sprinkler system is provided on the haul roads. A separate tanker is dedicated for wetting muck pile. Complied Attachment: Click to View
6	WATER QUALITY MONITORING AND PRESERVATION	Industrial wastewater (workshop and wastewater from the mine) should be properly collected, treated so as to conform to the standards prescribed under GSR 422 (E) dated 19th May, 1993 and 31st December, 1993 or as amended from time to time. Oil and grease trap should be installed before discharge of workshop effluents	PPs Submission	There is no generation of waste water in limestone mining. The wastewater generated from vehicle washings are routed through Oil & Grease separator then followed by sedimentation trap and finally on to land. For domestic wastewater i.e., toilet water goes to septic tank which is connected to soak pit. Complied Attachment: Click to View
			PPs Submission	There is no generation of waste water in limestone mining. The wastewater generated from vehicle washings are routed through Oil & Grease separator then followed by sedimentation trap and finally on to land. For domestic wastewater i.e., toilet water goes to septic tank which is connected to soak pit.

			Complied Attachment: NA
7	Human Health Environment	Personnel working in dusty areas should wear protective respiratory devices and they should also be provided with adequate training and information on safety and health aspects. Occupational health surveillance program of the worker should undertaken periodically to observe any contractions due to exposure to dust and take corrective measures, if needed.	PPs Submission As per company policy, all personnel working in the mine site are provided with PPE. Adequate training and information on safety and health aspects are regularly provided. Pre-employment medical examination and periodical occupational health surveillance programme for the workers is being undertaken. Annual medical check-up conducted for all employees (367 nos.) by external diagnostic laboratory M/s. Yodha Diagnosis, Hyderabad on 10th - 11th Sep, 2023 as required under Factories Act and records of the same are being maintained. Complied Attachment: NA
8	MISCELLANEOUS	A separate Environmental Management Cell with suitable qualified personnel should be set up under the control of a Senior Executive, who will report directly to the Head of the organization.	PPs Submission Environmental Management Cell is in place. Complied Attachment: Click to View
9	MISCELLANEOUS	The funds earmarked for environmental protection measures should be kept in separate account and should not be diverted for other purpose. Year wise expenditure should be reported to the	PPs Submission During the period Apr?23-Sep?23, MHIPL has spent ? 17.04 lakhs as recurring expenditure towards environmental protection measures in Mellacheruvu Mines. Complied Attachment: NA

		Ministry of Environment, Forest and Climate Change and its Regional Office located at Chennai.		
10	MISCELLANEOUS	The project authority should inform to the Regional Office located at Chennai regarding date of financial closures and final approval of the project by the concerned authorities and the date of start of land development work.	PPs Submission	Informed Complied Attachment: NA
11	MISCELLANEOUS	The Regional Office of this Ministry located at Chennai shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer(s) of the Regional Office by furnishing the requisite data / information / monitoring reports.	PPs Submission	Requisite data / information / monitoring data are being submitted to Regional Office, MoEF&CC regularly. Full cooperation will be extended to visiting officers. Complied Attachment: NA
12	MISCELLANEOUS	The Project proponent shall submit six monthly reports on the status of compliance of the stipulated Environmental Clearance conditions including results of monitored data (both in hard copy as well as by email) to the Ministry of Environment, Forest &	PPs Submission	Six monthly EC compliance status reports for the period OCT?22 ? MAR?23 sent to ecompliance-tg@gov.in on 29.05.2023. Complied Attachment: NA

		<p>Climate Change, its Regional Office Chennai, the respective Zonal office of Central Pollution control Board the State Pollution Board. The Proponent shall upload the status of compliance of the Environmental Clearance conditions, including results of monitored data on their website and shall update the same periodically. It shall simultaneously be sent to the Regional Office MoEF&CC, Chennai, the respective Zonal Office of Central Pollution Control Board and State Pollution Control Board.</p>		
13	Statutory compliance	<p>A copy of clearance letter shall be sent by proponent to concerned Panchayat, Zilla Parishad / Municipal Corporation, Urban Local Body and the local NGO, if any, from whom and suggestion / representation, If any, were received while processing the proposal. The clearance letter shall also be put on the website of the company by the proponent.</p>	PPs Submission	<p>Submitted to local Grampanchayat vide Lr. No. MHIPL/ENV/GEN/2015-16/4 dated 30th July 2015. Complied Attachment: NA</p>

14	Statutory compliance	The State Pollution Control Board should display a copy of the clearance letter at the Regional Office, District Industry Centre and Collector's Office / Tehsildar's Office for 30 days.	PPs Submission	Copy of the clearance letter displayed at the Regional Office, District Industry Centre and Collector's Office / Tehsildar's Office for 30 days. Complied Attachment: NA
15	Statutory compliance	The environmental statement for each financial year ending 31st March in Form-V as is mandated to be submitted by the project proponent to the concerned SPCB as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently, shall be put on the website of the company along with the status of compliance of Environmental Clearance conditions and shall also be sent to the Regional Office of the MoEF&CC Climate Change, Chennai by e-mail.	PPs Submission	Environmental Statement (Form-V) for the year 2022-23 submitted vide letter No. MHIPL/MCW/ENV/2023/202 dt. 23.09.2023. Complied Attachment: NA
16	MISCELLANEOUS	The project authorities should advertise at least in two local newspapers of the District or state widely circulated in which the project is located and one of which shall be in	PPs Submission	Environment Clearance information was published in 'Namaste Telangana' and 'The New Indian Express' on 01.08.2015. Complied Attachment: NA

		<p>the vernacular language of the locality concerned within 7 days of the issue of the clearance letter informing that the project has been accorded environmental clearance and a copy of the clearance letter is available with the State Pollution Control Board and also at web site of the Ministry of Environment , Forest and Climate Change at http://envfor.nic.in. And a copy of the same should be forwarded to the Regional Office at this Ministry located at Chennai.</p>			
17	Noise Monitoring & Prevention	<p>Measures should be taken for control of noise levels below 85 dB (A) in the work environment. Workers engaged in operation of HEMM, etc. should be provided with ear plugs / muffs.</p>	<table border="1"> <tr> <td>PPs Submission</td> <td> <p>? Workers exposed to high noise levels are being provided with earplugs and measures are being taken to reduce the ambient noise levels below the standards. ?
