## **Half Yearly Compliance Report** 2024 01 Dec(01 Apr - 30 Sep)

## Acknowledgement

Proposal Name	Expansion of cement plant of My Home Industries Private Limited – Clinker production from 3.5 MTPA to 7.0 MTPA & Cement production from 3.9 MTPA to 6.4 MTPA (OPC/PPC/PSC/CC) by enhancement of capacity of in Unit-IV (Under Implementation) Clinker production from 1.75 to 3.5 MTPA & Cement production capacity from 1.75 to 2.5 MTPA
Name of Entity / Corporate Office	MY HOME INDUSTRIES PRIVATE LIMITED
Village(s)	Mella Cheruvu
District	SURYAPET

Proposal No.	IA/TG/IND1/455170/2023
Plot / Survey / Khasra No.	876, 884, 1057, 1066,1065, 1067, 1068, 1069, 1070, 1071, 1072, 1073, 1075, 1081, 1080, 1084, 1094, 1095, 1096, 1097, 1098 & 1099
State	TELANGANA
MoEF File No.	IA-J-11011/215/2013-IA- II(IND-I)

Category	Industrial Projects - 1
Sub-District	MellaChervu
Entity's PAN	****9480C
Entity name as per PAN	MY HOME INDUSTRIES PRIVATE LIMITED

# **Compliance Reporting Details**

No. Particulars of captive limestone Mines in operation EC permitted production capacities (in MTPA) Proposed expansion (in MTPA) Total after expansion (in MTPA) 1 Mellacheruvu Limestone Mine (141.644 ha); 1.95 - 1.95 2 Yepalamadhavaram Limestone Mine(89.37 ha); 0.66 0.264 0.924 3 Choutapalli Limestone Mine (262.247 ha); 1.82 - 1.82 4 Choutapalli Limestone Mine-II (156.586 ha); 2.72 2.28 5.00 5 My Home Limestone Mine-II (252.407 ha). 1.00 - 1.0 Total 8.15 2.28 10.694 Present EC permitted capacity for limestone production is 8.15 MTPA. Limestone requirement for production capacity of Unit-IV Clinker -3.5 MTPA is 5.075 MTPA. Three tier Green Belt shall be developed in at least 33Percent of the project area in a period of one year all along the project site of adequate width and tree density shall not be less than 2500 per ha. Survival rate of green belt developed shall be monitored on periodic basis to ensure that damaged plants are replaced with new plants in the subsequent years. PP shall also develop greenbelt in the form of shelter belt comprising of total of 6 rows of 2x2 m plantation with tall trees and broad leaves with thick canopy along with windshield inside **GREENBELT** 6 the plant premises to act as green barrier for air pollution and noise levels towards sensitive areas such as schools and villages nearby project site. As committed, the additional greenbelt shall be developed all along the eastern and southern boundary. Compliance status in this regard, shall be submitted to concerned Regional Office of the MoEFCC. In addition to this PP shall revise the Green Belt Plan to maintain sizable GB width along inside boundary instead of proposed plant designs shown in the layout plan. PPs Submission: Being Complied Date: Overall greenbelt area developed is 68.0 Ha. (Cement Plant area160 Ha.) by planting of 69219 Nos. 12/11/2024 (42 Percent). In continual process further greenbelt development is being strengthened in eastern and southern boundary and road sides within and outside of cement plant. All the commitments made towards socio-economic development of the nearby villages shall be satisfactorily implemented. The action Corporate Environmental plan based on the social impact assessment study of the project as per 7 Responsibility the EMP in accordance to the Ministrys OM dated 30.09.2020 amounting to Rs. 16.5 Crores shall be strictly implemented and progress shall be submitted to the Regional Office of MoEFCC. **PPs Submission:** Agreed to Comply Date: All commitment made in socio-economic development of the nearby villages are being implemented 12/11/2024 in consultation with local body and villages. Details of implementation and spending will be submitted in six monthly report. This EC granted to the project/ activity is strictly under the provisions of the EIA Notification, 2006 and its amendments issued from time to time. It does not tantamount/ construe to approvals/ Statutory compliance consent/permissions etc., required to be obtained or standards/conditions to be followed under any other Acts/Rules/Subordinate legislations, etc., as may be applicable to the project. Date: **PPs Submission:** Agreed to Comply 12/11/2024 Agreed to comply This Environmental clearance is granted subject to final outcome of Honble Supreme Court of India, Honble High Court, Honble NGT 9 Statutory compliance and any other Court of Law, if any, as may be applicable to this

		ocess stacks as per CPCB guidelines for manual monitoring	Date: 12/11/2024
30	AIR QUALITY MONITORING AND PRESERVATION	Appropriate Air Pollution Control (APC) system shafor all the dust generating points including fugitive dus vulnerable sources, so as to comply prescribed stack enfugitive emission standards.	t from all

#### PPs Submission: Being Complied

Air Pollution Control (APC) systems are installed. Dust collectors and extraction systems at various sections for controlling fugitive dust emissions are as follows: i. Raw mill and Kiln Pulse Jet Bag House ii. Clinker Cooler - ESP iii. Limestone crusher, Coal Mill and Cement Mill - Bag House iv. All transfer points - Bag Filters v. Limestone dump hopper - Water spray system Limestone stackers - Water spray system All transfer points and storage silos are provided with dust collection and extraction systems for effective control of fugitive emissions. Major stack emissions are being maintained within prescribed standards of 30 mg/Nm3.

Date: 12/11/2024

AIR QUALITY
MONITORING AND
PRESERVATION

The project proponent shall provide leakage detection and mechanized bag cleaning facilities for better maintenance of bags.

#### PPs Submission: Being Complied

Mechanized bag cleaning facility is in place for all bag houses and bag filters are auto-operated by solenoid valve system.

Date: 12/11/2024

32 AIR QUALITY
MONITORING AND
PRESERVATION

Sufficient number of mobile or stationery vacuum cleaners shall be provided to clean plant roads, shop floors, roofs, regularly.

#### PPs Submission: Being Complied

Truck mounted vacuum cleaner, road sweepers and hand operated flipper machines are utilized and good housekeeping is being maintained for controlling secondary fugitive dust emissions.

Date: 12/11/2024

33 AIR QUALITY
MONITORING AND
PRESERVATION

Ensure covered transportation and conveying of raw material to prevent spillage and dust generation. The project proponent use leak proof trucks/dumpers carrying coal and other raw materials and cover them with tarpaulin.

## PPs Submission: Being Complied

Most of the raw material and cement is transported by rail and trucks covered with tarpaulin to prevent spillage and dust generation.

Date: 12/11/2024

AIR QUALITY
MONITORING AND
PRESERVATION

The project proponent shall provide primary and secondary fume extraction system at all heat treatment furnaces.

## **PPs Submission:** Complied

Not Applicable. It is cement manufacturing plant, There is no primary and secondary fume extraction system.

Date: 12/11/2024

35

AIR QUALITY MONITORING AND PRESERVATION

Wind shelter fence and chemical spraying shall be provided on the raw material stock piles.

## **PPs Submission:** Being Complied

Raw materials are being stored in covered sheds. Also, provided wind shelter fencing with water sprinkling system for coal storage yard to control fugitive emissions.

Date: 12/11/2024

36

AIR QUALITY MONITORING AND PRESERVATION

Design the ventilation system for adequate air changes as per prevailing norms for all tunnels, motor houses, Oil Cellars.

#### PPs Submission: Being Complied

Cement bagging plant is open and adequate ventilation is present. Manual work area air monitoring is carried out monthly to check for presence of PM in the area. All the working staff in bagging section area mandatorily made to wear nose mask and other appropriate protective PPE.

Date: 12/11/2024

37 AIR QUALITY
MONITORING AND
PRESERVATION

Pollution control system in the plant shall be provided as per the CREP Guidelines of CPCB.

PPs Submission: Complied

The following Air Pollution Control systems are installed to control PM emission: 1. Raw Mill Bag House Kiln, 2. Electrostatic Precipitator (ESP) - Cooler and 3. Bag house / Bag filters - Cement mill, coal mill and transfer points.

Date: 12/11/2024

38

AIR QUALITY MONITORING AND PRESERVATION The project proponent shall adopt the Clean Air practices like mechanical collectors, wet scrubbers, fabric filters (bag houses), electrostatic precipitators, combustion systems (thermal oxidizers), condensers, absorbers, adsorbers, and biological degradation. Controlling emissions related to transportation shall include emission controls on vehicles as well as use of cleaner fuels. Sufficient numbers of additional truck mounted Fog/Mist water cannons shall be procured and operated regularly inside the project premises and also in the surrounding villages to arrest suspended dust in the atmosphere.

PPs Submission: Being Complied

The following clear air practices are adopted to control dust generations. 1. Raw Mill Bag House Kiln, 2. Electrostatic Precipitator (ESP) - Cooler and 3. Bag house / Bag filters - Cement mill, coal mill and transfer points. Pollution certified vehicles are being allowed to due control emission from vehicles during transportation. Water tankers are deployed for water sprinkling on the roads regularly inside the plant to reduce dust generation. Water tankers are deployed in surrounding villages for water sprinkling on roads for dust suppression. Truck mounted Fog/Mist water cannons will be operated in the surrounding villages to arrest suspended dust in the atmosphere.

Date: 12/11/2024

39

AIR QUALITY MONITORING AND PRESERVATION

Bag filters shall be cleaned regularly and efficiency of bag filter system shall be monitored at regular intervals.

PPs Submission: Being Complied

Bag filters are being cleaned regularly and bag filters efficiency is being monitored regularly as per scheduled maintenance.

Date: 12/11/2024

40

AIR QUALITY MONITORING AND PRESERVATION Water Sprinklers/Water mist system shall be installed near raw material yards, operational units and other strategic locations to control fugitive emissions from the plant.

PPs Submission: Being Complied

All precautionary measures are taken to control fugitive emissions by providing Bag House to Kiln, Bag house / Bag filters - Cement mill, coal mill, Clinker storage tanks and transfer points. CC Roads are constructed. Water sprinkling is being done through water tankers. We ensure fugitive emissions are being maintained within prescribed limits.

Date: 12/11/2024

41

AIR QUALITY MONITORING AND PRESERVATION The particulate matter emissions from the process stacks shall be less than 30 mg/Nm3 and measures shall be undertaken as per the submitted action plan. Efficient Air monitoring equipment shall be installed.

PPs Submission: Being Complied

The following Air Pollution Control systems are installed to control PM emission: 1. Raw Mill Bag House Kiln, 2. Electrostatic Precipitator (ESP) - Cooler and 3. Bag house / Bag filters - Cement mill, coal mill and transfer points. APCE for major stacks are designed for 30 mg/Nm3. Stack emissions are being monitored through NABL accreted laboratory, emission values are being recorded within permissible limit.

Date: 12/11/2024

42

AIR QUALITY

Following additional arrangements to control fugitive dust shall be

#### MONITORING AND provided: a. Fog / Mist Sprinklers at all on bulk raw material storage **PRESERVATION** area (at the transfer points) like Iron Ore, Coal and for Fly Ash and similar solid waste storage areas. b. Proper covered vehicle shall be used while transport of materials. c. Wheel washing mechanism shall be provided in entry and exit gates with complete recirculation system. PPs Submission: Being Complied a) Mechanical water sprinklers are installed for coal yard to control fugitive emissions. Fly ash is Date: being stored in fly ash silo. Solid waste is being stored in shed. Raw materials is being transported 12/11/2024 through closed belt conveyors to prevent spillage. b) Raw material and cement is transported by rail and trucks covered with tarpaulin to prevent spillage and dust generation. c.) Requirement of wheel washing mechanism will be explored. AIR QUALITY Provide Low NOx burners as primary measures and SCR /NSCR MONITORING AND 43 technologies as secondary measure to control NOx emissions. **PRESERVATION** PPs Submission: Being Complied Date: Low NOx Burner are installed in cement kiln for controlling NOx emissions. NOx levels are being 12/11/2024 monitored through NABL accreted laboratory, emission values are maintain well within the prescribed limits AIR QUALITY The emission norms applicable for the cement plant shall be 44 MONITORING AND adhered to. **PRESERVATION** PPs Submission: Being Complied The following Air Pollution Control systems are installed to control PM emission: 1. Raw Mill Bag Date: 12/11/2024 House Kiln, 2. Electrostatic Precipitator (ESP) - Cooler and Bag house / Bag filters Cement mill, coal mill APCE for major stacks are designed for 30 mg/Nm3 Stack emissions are being monitored through NABL accreted laboratory, emission values are being recorded within permissible limit. AIR OUALITY Dioxin and Furan monitoring shall be carried out once in six 45 MONITORING AND months at cement kiln stack. **PRESERVATION** Date: **PPs Submission:** Agreed to Comply 12/11/2024 Dioxin and Furan monitoring will be carried out in once in six months in kiln-Bag House stack. Project proponent shall submit a study report on Decarbonisation program, which would essentially consist of companys carbon emissions, carbon budgeting/balancing, carbon sequestration activities and carbon capture, use and storage and offsetting strategies. Further, the report shall also contain time bound action 46 **GREENBELT** plan to reduce its carbon intensity of its operations and supply chains, energy transition pathway from fossil fuels to Renewable energy etc. All these activities/ assessments should be measurable and monitor able with defined time frames. Date: **PPs Submission:** Agreed to Comply 12/11/2024 Decarbonisation programe along with action plan will be conducted and will be implemented. Greening and Paving shall be implemented in the plant area to 47 **GREENBELT** arrest soil erosion and dust pollution from exposed soil surface. Date: **PPs Submission:** Agreed to Comply

12/11/2024

Greening and Paving will be implemented in the plant area to arrest soil erosion.
